

10 STEP - FIRST DENTURE GUIDE

*Here's how
it works:*

Denturist Jennifer Aulds

1

Exam and treatment planning
with your denturist and coordination with
the dentist/oral surgeon who will be
removing the teeth.

2

Clinical work-up
about what to expect. Including
impressions, bite registration,
tooth selection and patient education.

3

Fabrication of the denture
takes place **BEFORE** the natural teeth are
removed. Then they are delivered to the
dentist/oral surgeon.

4

Extraction of natural teeth
and immediate insertion of dentures

5

Follow up appointment
within one week of extractions,
to help you feel more comfortable.

6

Post-surgical follow-up
within two weeks, to adjust the
denture for rapid shape changes of
the mouth as the tissues heal.

7

Adjustment follow-up
within one month to adjust
what needs to be adjusted.

8

Patient & denturist chat
to decide how frequently you need
to return for further adjustments
and liners.

9

Permanent reline
6 months later

10

You can't stop smiling!
